TIME MEDS

FLASH-FORWARD

DEAR READERS,

It's our last issue of the school year, and we're focusing on the future. We recently asked kids to tell (and show) us what the world might be like in 100 years. You can see a few of their clever and creative visions on the pages ahead.

Looking less far into the future: Summer is right around the corner. What are your summer

plans? Keep in touch with us at *tfkeditors@time.com*. And visit *timeforkids.com* to keep up with current events, Press Club, Your **5** Job, and more.

Have a great summer!

STARSHIP LAUNCHES

BY BRIAN S. McGRATH

On April 20, SpaceX launched its first test flight of Starship, the biggest rocket ever built. The 400-foot-tall, stainless steel ship took off from Starbase, a spaceport in southern Texas. No people were on board for this launch.

"I'm not saying it will get to orbit, but I am guaranteeing excitement," SpaceX founder Elon Musk said of the planned launch, in March.

As it turned out, Starship did not get into orbit. The plan was for it to make a 90-minute trip partway around the planet. But about four minutes after liftoff, the rocket exploded. Even so, just getting the rocket off the launchpad was a major success for SpaceX.

For now, the company is focused on getting a Starship rocket ready to take NASA astronauts to the moon by 2025, and eventually, to Mars. It has room for 100 passengers.

SpaceX could make spaceflight a profitable business. Its rockets are designed to be reusable. This will make it less expensive to send everything from people to satellites

into space.

For at least a few minutes, people who gathered on nearby South Padre Island to watch the launch got their excitement. As Starship took off, they screamed: "Go, baby, go!"

Stop and Think!

WHY is the Starship rocket newsworthy? How might it change the space business? What else would you like to learn about Starship?

What's Trending?

A trend is something that's popular for a short period of time. For example, wraparound sunglasses were trendy in the 1980s. A decade later, kids begged their parents for Furbies and Tamogotchis. (Never heard of these toys? Trust us. They were huge.) In recent years, bubble tea has been all the rage. Fashion, toy, and food trends come and go. But one thing's for sure:

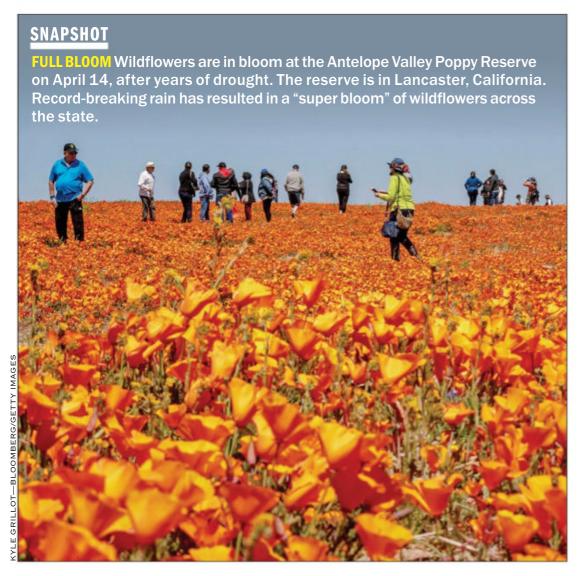

Trends are fun for journalists to write about.

Junior Journalists, we want to know:

What's trending? Is there a fashion trend that kids in your school are following? Is there a game or activity that your classmates can't get enough of? Which trends are making a comeback? What do you think will be trending in the future? Tell us! And please, send photos! Ask a teacher, parent, or guardian to send your trend report to us at

YUCK! The slime trend was big several years ago. TFK reported on it in 2017.

NEWS STORIES MAY INCLUDE REPORTING FROM THE ASSOCIATED PRESS

IMAGINE 2123

TIME magazine just celebrated its 100th birthday. To mark the milestone, we asked kids to imagine life 100 years in the future.

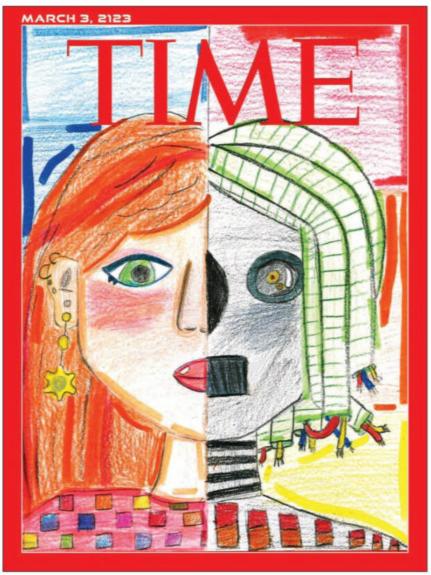

TIME magazine has been around, well, a long time. Its first issue was published 100 years ago, on March 3, 1923. Life was different back then. The Ford Model T was the most popular car in America. Meanwhile, kids were excited by a little red wagon called the Radio Flyer. Speaking of radio, did you know it was a new technology in 1923? Television didn't even exist.

We've come a long way since then. To celebrate a century of TIME, we asked TIME for Kids readers: What will the world be like 100 years in the future? And we invited you to imagine what might be on TIME's cover in 2123. Our inbox filled up with amazing artwork and writing. Here are a few examples of how kids see the world 100 years from now, as well as the questions, predictions, and hopes they have for the kids of the future. We wish we had room to include everything! Your creativity and curiosity inspire us.

FROM ATHLETE TO ARTIST

Micah Johnson used to play professional baseball. Then he traded his baseball bat for a paintbrush.

My name is Micah Johnson. I'm from Indianapolis, Indiana. For 24 years, I played baseball every day. I reached the highest of levels of the sport, playing for major-league teams. Once I got there, I was like, "Okay, I did it." I don't care if it takes 100 years: If it's something that somebody says I can't do, I'm going to try everything I can to do it. And when I do it, I think, "Okay, what's the next thing I'm going to do?"

I started painting in 2016, when I was with the Los Angeles Dodgers. You come home from a game and you're all amped up. You're not just going to bed. So that's when I would paint. And then I would take canvases on the road. I was just so obsessed with painting that I couldn't put it down.

In 2018, my time was done in Major League Baseball. I'd fallen in love with art and creativity. I tapped into that. So I figured it was time to give that a shot. I started painting young Black kids as astronauts after I heard a young Black kid ask if astronauts could be Black. Painting these pictures was incredibly fulfilling. I knew this was something special.

REACH FOR THE STARS

I wanted to reach a broader audience with my message. So I created this 3D character named Aku. He's a Black character who's very brave and very confident. He wears an oversize vintage space helmet. The helmet allows him to travel

through these digital realms. Last year, Aku was on the cover of TIME. Later, I made him into an NFT.

NFTs are unique, digital artworks that are bought and sold online. With NFTs, there are no gatekeepers. I can upload something and people can buy it and have ownership of it. Let's say you own an Aku. You can sell it, you can trade it, you can take it across platforms in the future.

I traded my baseball bat for a paintbrush and found my passion. Kids can find a path that's meaningful to them by showing up every day, exploring, and then just going

deeper into the things they care about.

In 2021, an NFT of Aku orbited Earth on board the International Space Station. That's something you can't even dream of! If you just keep working toward something that you're passionate about, opportunities are going to present themselves that you can't even imagine.

—By Micah Johnson, as told to TIME for Kids

Power Words -----

fulfilling *adjective*: providing happiness or satisfaction

gatekeeper noun: a person who controls access to something

SPRING MOVIE PREVIEW

Get ready for fun at the movies! This spring, an old favorite is returning to the big screen with an exciting young actor in the starring role. And a new animated feature will introduce moviegoers to the citizens of a magical city. Here are two TFK tips about must-see films coming soon. —By Cristina Fernandez

OPPOSITES ATTRACT

Step into a magical city in **ELEMENTAL**, the latest film from Disney and Pixar. Its citizens are grouped according to the four elements: fire, water, earth, and air. The story follows a fire elemental, Ember Lumen, and a water elemental, Wade Ripple, who meet and fall in love although they can't even hug.

Ember and Wade face challenges such as personality differences and judgment from their families. But together, they learn that they have more in common than they expected.

This colorful animated adventure begins on June 16.

BEYOND THE SEA

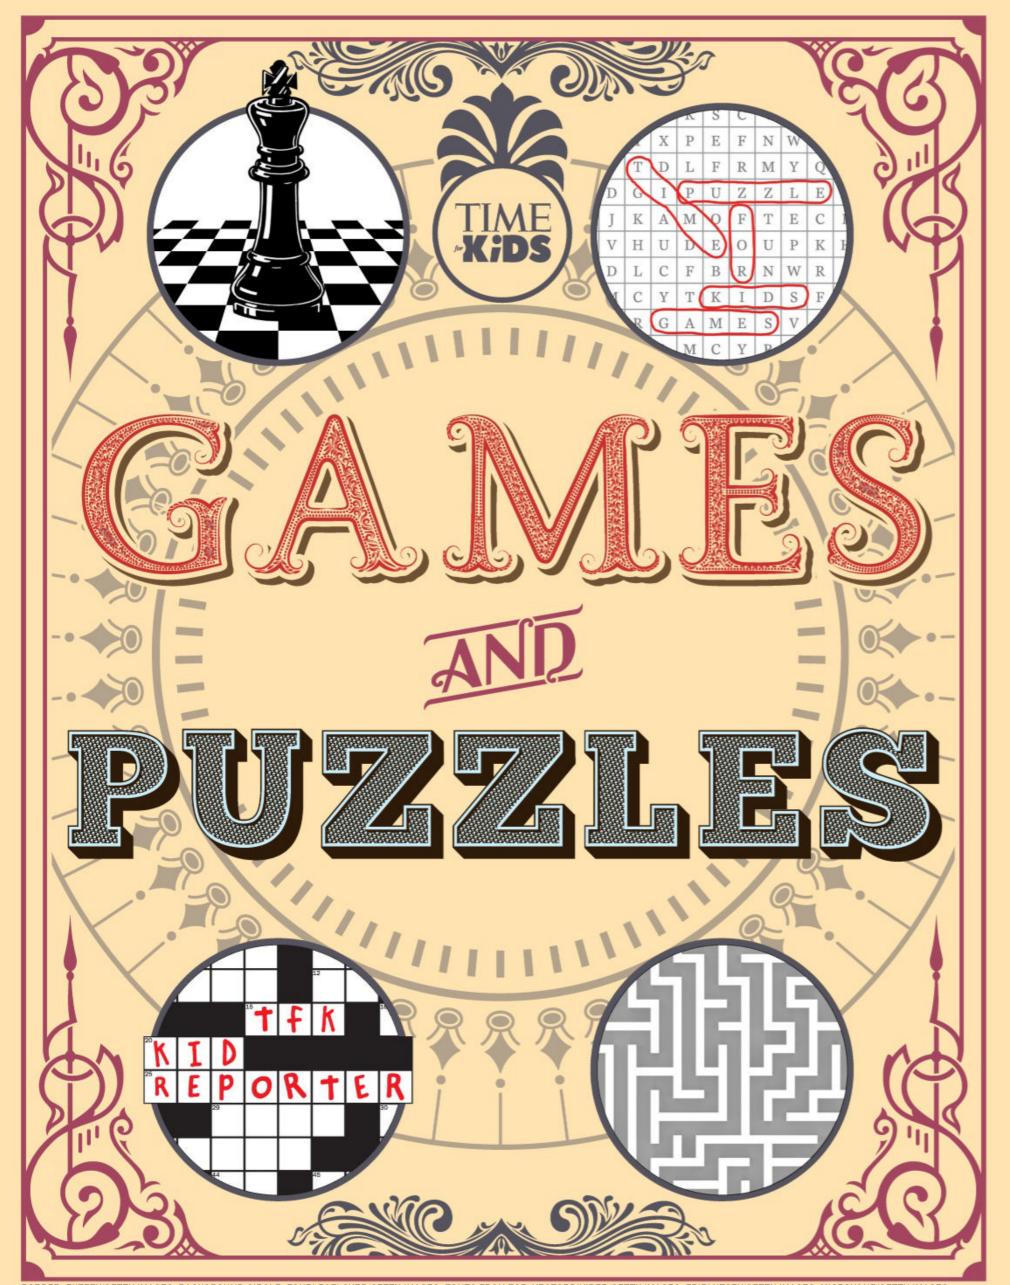

Dive back into the sea on May 26 with this live-action remake of a classic Disney film. **THE LITTLE MERMAID** stars Halle Bailey as Ariel, a mermaid fascinated by the human world.

After rescuing Prince Eric from a shipwreck, Ariel is determined to explore life on land. Against her father's wishes, she makes a deal with a sea witch named Ursula, trading her voice for a pair of legs.

Audiences will love rediscovering this beloved tale. It features music by *Aladdin* composer Alan Menken and *Encanto* composer Lin-Manuel Miranda.

True of False?

How much do you know about cats?

To find out, decide if each answer is true or false.

Every U.S. president has had a cat as a White House pet.

TRUE or FALSE

Early Egyptians worshipped a cat goddess.

TRUE or FALSE

Cats are in the same animal family as lions.

TRUE or FALSE

In the United States, there are more pet dogs than pet cats.

TRUE or FALSE

Every cat's nose makes a unique print, much like a human fingerprint does.

TRUE or FALSE

A cat has more bones in its body than a human does.

TRUE or FALSE

Cats spend more than half of their lives sleeping.

TRUE or FALSE

A Pomeranian is a type of cat breed.

TRUE or FALSE

A sphynx cat has little or no fur.

TRUE or FALSE

10.

Tabby is the most common cat-coat pattern.

TRUE or FALSE

11.

Cats are color-blind.

TRUE or FALSE

12.

A group of cats is called a clowder.

TRUE or FALSE

13.

In 1988, a cat named Blackie inherited more than \$10 million.

TRUE or FALSE

14.

The Guinness World Record for Longest Jump by a Cat (horizontal) is seven feet.

TRUE or FALSE

15.

Nala_cat has more than 12 million Instagram followers.

TRUE or FALSE

16.

In 1963, a French cat named Félicette survived a launch into space.

TRUE or FALSE

17.

You should not feed grapes or raisins to a cat.

TRUE or FALSE

18,

Creme Puff, the oldest cat on record, lived to be more than 40 years old.

TRUE or FALSE

Give yourself 10 POINTS for each correct answer to see if you are a cat scholar!

Good try, but you might be a dog person.

Purr-fectly okay. You know some feline facts.

130-180

Cat-tastic! You really know your kitty stuff.
